KEY HIGHLIGHTS

- **Premier Car Wash Market:** The express/conveyor car wash sector continues to dominate NNN investment sales, with cap rates in the 4–5.5% range and national operators on long-term absolute NNN leases — one of the most landlord-favorable structures in commercial real estate.
- **High-Traffic Captive Location:** Positioned at a signalized intersection carrying 50,000 + vehicles per day on SR-74, with strong weekend recreational traffic — precisely the volume profile operators like Mister Car Wash, Magnolia, and Super Star Car Wash underwrite for new locations.
- **Last-Exit Opportunity:** Travelers heading into the Cleveland National Forest or Orange County frequently return home through Lake Elsinore — making the outbound return trip an additional captive wash opportunity. This dual-direction traffic capture is a significant upside driver.
- **Strong Operator Pipeline:** National car wash brands are among the most active buyers of entitled pads in high-traffic Southern California corridors. This site's traffic counts, visibility, and market void position it at the top of any site selection list.
- **Complementary Anchoring:** Co-located with a gas station (Lot 1) — a proven demand pairing. Fuel customers are among the highest-frequency car wash customers, and a combined fuel-plus-wash stop maximizes the value of a single trip.
- **Fee Simple, Entitled:** Clean fee simple ownership of an entitled pad nearing final Tentative Tract Map approval. Minimal entitlement risk for incoming operator or investor.

IDEAL TENANT / BUYER PROFILE

This pad is well-suited for the following categories of tenants, operators, and buyers:

- National express wash: Mister Car Wash, Magnolia Car Wash, Super Star Car Wash
- Regional operators: Tommy's Express, Cobblestone, Whistle Express
- Full-service/detail: Independent or franchise full-service operator
- NNN investor acquiring pad for ground lease or sale-leaseback with operator

LOCATION CONTEXT

The Ortega Hwy & Grand Ave development is located at the southernmost direct commercial gateway between Riverside County and Orange County via SR-74. Westbound travelers face approximately 13 miles of undeveloped mountain corridor through the Cleveland National Forest before reaching commercial services on the Orange County side — making this site the definitive last-exit commercial node for fuel, food, and services. Daily traffic on SR-74 at this location runs approximately **50,000 + vehicles per day**, with elevated weekend recreational volumes from hikers, mountain bikers, campers, and coastal-bound families. Within a 5-mile radius, the population exceeds **90,000 residents** with a median household income above \$70,000, providing a strong local demand base to complement the corridor's traveler traffic.

- **Unmatched Market Position:** Owning the entire last-exit commercial node at this location is a generational real estate opportunity in Southwest Riverside County.
- **Institutional-Grade Scale:** At \$(Call for Price) the portfolio is appropriately sized for institutional capital, family office, or regional developer platforms.
